

BRING THIS TO YOUR APPOINTMENT

Questions to Ask Your Doctor

You do not need to be a doctor to advocate for yourself. You just need the right questions. Print this, bring it, and take notes.

- 1 Given my history, am I at higher risk for uterine (endometrial) cancer?

- 2 Should any bleeding after menopause be evaluated, even a little?

- 3 Which warning signs should I never ignore?

- 4 Do my symptoms warrant an ultrasound or a biopsy?

- 5 If I had abnormal bleeding, what would we do, and how quickly?

- 6 What can I do to lower my risk?
